For Sale : **€ 6,500**

Description
In the hill country of the Nicosia district, a short walk from the centre of Farmakas, this residential field for sale in Cyprus offers a chance to put down roots in authentic Cypriot village life. Its zoning is for residential use, so the land carries the promise of a home of your own in a setting with a strong local identity. At 428 m², the plot has an irregular shape and a sloping surface, the kind of ground that rewards a thoughtful design. Everyday needs are close by, with restaurants, cafés and a medical centre or pharmacy a short drive away, and a school within easy reach. Neighbouring villages such as Kampi and Apliki add to the sense of a close-knit community. Weekends can be spent walking up to Kionia peak or Papoutsa, or exploring the traditional village of Fikardou and the Church of the Transfiguration of the Saviour. Above all, this is a place to build a life around mountain village character and a closer connection to nature.
