meets neighb...

For Sale : **€ 235,000**

Description
On the edge of Strovolos, where Agios Vasileios meets neighbouring Lakatameia, a sizeable field of 2,611 m² waits for someone with a home in mind. It is a calm, open piece of suburban Nicosia, with room to think, to plan and to picture what could rise here.

The land is square, with an even surface that makes it easy to read at a glance. It fronts an avenue, giving it direct road access. Most of it lies in a residential zone, leaving room for a home of your own. A small part falls within a protection zone.

Everyday life stays comfortably close. Schools and supermarkets are a short drive away, so the school run and the weekly shop can fit easily around the day. It is an honest setting rooted in the ordinary rhythm of the town around it, the kind of place where a household could settle and grow.

Level ground, a clear shape and a residential setting beside Lakatameia: your next chapter could begin right here in Strovolos.
