For Sale : **€ 140,000**

Description
With the centre of Athienou within easy reach, this large field of 13,750 m² sits in the Larnaca district, close to the everyday life of the village.

The land has a regular shape and a sloping surface, and it fronts a public road on two of its sides, so it has direct road access from both. Most of the field lies in a commercial zone, suited to business use, while part of it is residential land with room for a home.

That mix gives the land two possible characters: a place for enterprise close to the heart of Athienou, and a corner where a home could one day take shape. The two road frontages make it easy to picture how each part might be reached.

The sale is for a 1/4 share of the field. A sizeable piece of Athienou, with roads along two sides and the village centre close by.
