### Description

Small Development and High-Value Living

The Foundation of Your Future. This expansive 1422 sq.m residential plot in Kato Deftera represents a sophisticated development opportunity in one of Nicosia's most serene and rapidly evolving suburban enclaves. Falling within the H2 planning zone, the property offers a building density of 90% and a 50% coverage factor, providing the technical capacity for a high-value small development of multiple units or a grand, custom-designed family estate with extensive private grounds. This density profile is ideal for a versatile project that balances privacy with high yield potential. In March 2026, the Nicosia residential market is experiencing a significant value surge following the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution (SDC) on rental income, drastically improving net yields for long-term investors. Furthermore, the 2026 market is characterized by a strong shift toward high-quality suburban living, supported by the government's latest green-building grants and major infrastructure milestones. The plot's significant size and superior technical specifications ensure a secure and appreciating investment, a standard of smart investment we have guided for 3 decades of experience.
