Description

High-Yield Development and Strategic Acquisition

This substantial residential plot in the heart of Palouriotissa represents an elite opportunity for high-density urban development. Falling within the Kα3 planning zone, the property boasts a substantial building density of 140% and a 50% coverage factor, specifically designated for the erection of a modern four-storey apartment complex reaching up to 17 meters in height. The plot features an expansive area of 625 square meters with ideal dimensions of approximately 24.5 by 25.5 meters, providing a regular shape that maximizes architectural efficiency and parking layout. A significant financial advantage of this site is that it is not subject to VAT, providing an immediate and substantial saving for developers and investors. In March 2026, Palouriotissa has emerged as a focal point for urban redevelopment, driven by its immediate proximity to the capital's central business district and the sustained demand for high-quality housing from young professionals and the academic community. The local real estate market in 2026 is further bolstered by the historic tax overhaul on January 1st, which included the full abolition of stamp duty and the removal of the 3% Special Defence Contribution on rental income, making this an ideal "Build-to-Rent" asset. For those seeking to capitalize on Nicosia's urban growth with a high-yield development, this plot offers a secure foundation for 3 decades of experience.
