For Sale : **€ 0**

Description
Agios Georgios belongs to Latsia, a town where the day can stay close to home. Schools are within walking distance, and the motorway between Nicosia and Limassol is easily reached from the area, so both cities stay within comfortable reach. This large field of 9,309 m² lies on residential land, where the general use is a home. Picture a morning that begins with a walk to school and ends back in a familiar corner of Latsia. It is a setting shaped by ordinary family life rather than by a long commute. For anyone thinking about a future home in this part of Nicosia district, the field offers a sizeable stretch of residential ground in a town that is well connected. The sale covers a 1/12 share of the field. What remains is a residential setting in Latsia, with school a short walk away and the road to either city close at hand.
