The village surroundings of Anafotida frame this
large resid...

For Sale : **€ 60,000**

Description
The village surroundings of Anafotida frame this large residential field, a short drive from the heart of the community. The ground is level and regular in shape, the kind of land where plans take form simply and boundaries fall into place with ease.

A long frontage runs along a dirt track, which gives the field direct access. Its residential zoning points to homes, and the land suits division into individual plots or a single unified residential development. Larnaca International Airport is a drive away, so trips abroad and visits from family start close to home.

The sale is a 1/6 share of the field. A distribution agreement is in place and assigns a defined part of the plot to this share.

Level ground, a village setting and room for homes make this field in Anafotida a grounded place to begin.
