Family Living and Long-term Investment

The Foundation of Your Future. This 651sqm residential plot in Kato Deftera represents an exceptional opportunity for those seeking to build a custom family home in one of Nicosia's most tranquil and promising suburban districts. Falling within the H2 planning zone with a 60% building density and 35% coverage factor, the property provides a balanced canvas for a spacious private residence that prioritizes both interior living space and garden privacy. In March 2026, the Nicosia residential market is experiencing a significant value surge following the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution on rental income, drastically improving the net value of land acquisitions. Furthermore, the 2026 market is characterized by a strong shift toward high-quality suburban living, supported by the government's 6th Edition of the Housing Scheme for the Revitalization of Mountainous and Disadvantaged Areas, which offers combined grants for primary residences. The plot's placement within a quiet neighborhood ensures a secure and appreciating investment, a standard of smart investment we have guided for 3 decades of experience.
