For Sale : **€ 200,000**

Description
Tseri offers an inviting residential setting, with restaurants and cafés within walking distance and the centre of Nicosia easy to reach. On the southern side of a larger residential development here stand two semi-detached houses, each with the makings of a true family home.

Each house has a covered area of 162 m² and is designed to hold three bedrooms once finished. The houses are incomplete and need to be finished before anyone can live in them. That work is where their future takes shape, as two homes built side by side.

Picture the finished result: an evening stroll to a nearby café, everyday errands in the village, and the city within easy reach when work or a night out calls. Tseri combines that village rhythm with a direct link to the wider Nicosia area.

The sale is a 25.35% share of the development, and a distribution agreement is in place. Two family-sized houses in a well-connected village, waiting for the work that will turn them into homes.
