For Sale : **€ 1,980,000**

Description
Within Nicosia itself, in the Panagia quarter, this large field sits among homes and open parcels, with easy reach of the city centre. Restaurants, cafés and green spaces are all within walking distance, so the everyday life of the capital is never far away.

The land covers 25,995 m², with an irregular outline and a gentle slope. It has direct road access along a generous stretch of frontage, and electricity, water and telecommunications already serve the site. One side borders a military base.

The zoning is residential and allows building up to four floors. It is a setting where a home could take shape in a convenient urban neighbourhood, with the city's cafés and parks close at hand and room around you to plan with care.

The sale is for a 13/35 share of the field.

A large residential holding with road frontage and services in place, in a well-connected corner of Nicosia.
