In Agios Antonios, a neighbourhood of commercial buildings c...

For Sale : **€ 1,850,000**

Description
In Agios Antonios, a neighbourhood of commercial buildings close to the centre of Nicosia, this corner plot sits where two streets meet. It has direct road access and a long frontage along each of them.

The land covers 686 m² and is zoned for commercial use, with room for a business building of up to eight floors. Its corner position means a building here would face two streets at once, so it would be seen from both.

Getting around is straightforward. The city centre is within easy reach, and the historic walled city of Nicosia is within walking distance, so its old streets and squares are never far from your door. Main roads are also easy to reach, which links the plot with the wider city and beyond.

A corner site in a commercial quarter, a short walk from the heart of old Nicosia, with space to raise something of real presence.
