For Sale : **€ 1,170,000**

**Description**
Within Nicosia itself, in the Panagia quarter, two adjacent plots of residential land sit among a mix of houses, apartment buildings, offices and shops. The city's everyday life is all around, and supermarkets and schools are within walking distance.

Together the plots cover 4,005 m² of flat, even ground in a neat rectangular shape. Level land like this is simple to picture and simple to plan around. One of the plots fronts two streets, giving the land direct road access on two sides.

The land is zoned for residential use, and up to four floors may be built here. Imagine a home rising on this level ground, with the shops of the neighbourhood a short walk away.

A sizeable piece of flat residential land with two street frontages, set within a convenient urban setting in the heart of Panagia.
