Description
In Agios Georgios, Latsia, two fields of 3,400 m² and 200 m² come together as one holding. The larger field is irregular in shape and the smaller one is triangular, and both have a slightly sloping surface. Each one fronts a road, so the land has direct road access, and water, electricity and telecommunication services are available.

The immediate area mixes residential developments with undeveloped parcels of land. The Nicosia–Limassol motorway lies close by and gives good links towards Nicosia city centre, and Strovolos is a short drive away. Together, the two fields make up 3,600 m² of land within Latsia.
