For Sale : **€ 195,000**

Description
On the edge of Pano Pyrgos, where farmland and undeveloped ground stretch out around the village, three adjoining fields come together as one large holding of 19,065 m². It is a relaxed rural setting, shaped by the slower rhythm of village life and the open landscape that surrounds it.

Part of the land lies within a residential zone and part within an agricultural zone. This gives room for a home on the residential part, with farming on the rest. The land has no direct road access.

The village itself sits just beyond the fields, and its centre is a short drive away. Further afield, the Gialia Monastery lies within a drive, and the Cyprus Mufflon Enclosure is in the wider region, adding a sense of history and nature to the area.

Three fields side by side, countryside all around and the village close at hand: a sizeable stretch of land in authentic village surroundings.
