Description
Just outside Skarinou, this sizeable field of 2,676 m² sits where the village's homes meet open parcels of land. Supermarkets and shops are within walking distance, so the daily round of bread, groceries and small errands can be done on foot.

The land lies in a residential zone, offering room for a home in a setting of residential developments and undeveloped plots. Further afield, Choirokoitia and the Dipotamos Reservoir are both a short drive away, and the village of Kofinou is close by too.

The land has no direct road access.

A residential plot on the edge of Skarinou, where you can picture a home taking shape with the life of the village within easy reach.
