Description

High-Yield Development and Strategic Acquisition

The Foundation of Your Future. This prime residential plot in the prestigious Lykavitos area of Nicosia represents an elite opportunity for developers and institutional investors to secure a high-yield asset in the city's heart. Falling within the high-density Kα3 planning zone, the property provides an exceptional building density of 140% and a 50% coverage factor, offering the technical capacity for a prominent four-storey residential building with a maximum height of 17 meters. This high-density profile is ideal for a state-of-the-art apartment complex or a luxury multi-unit development in one of Nicosia's most sought-after urban enclaves. In March 2026, the central Nicosia real estate market is experiencing a significant value surge following the landmark January 1st tax reform, which fully abolished stamp duty and removed the Special Defence Contribution on rental income, drastically improving net yields for residential landlords. Furthermore, the district's connectivity and appeal have been fundamentally enhanced by recent urban regeneration projects and its proximity to the capital's administrative core. The plot's superior technical specifications and its placement within a core residential enclave ensure a secure and appreciating investment, a standard of smart investment we have guided for 3 decades of experience.

Description Residential plot in Lykavitos. The property is zoned as Kα3 (residential) with 140% building density, 50% coverage, maximum floors 4 and a maximum height of 17m. The plot allows for a modern architectural design that maximizes functional square footage in a high-demand central residential area. Its position within the Nicosia Municipality ensures access to world-class infrastructure and professional municipal services. Title deed is available.
