

For Sale, Land, Field, Nicosia, Xyliatos

In the very centre of Xyliatos, close to the village church,...

For Sale : **€ 72,000**

Description
In the very centre of Xyliatos, close to the village church, this field sits among homes and open parcels of land, where everyday village life unfolds just beyond its edges. It is a setting with real character, rooted in the rhythm of a Nicosia hillside community. The land measures 4,464 m², a large and generous plot within a residential zone. That gives room for a home of up to two floors, set within the fabric of the village rather than on its outskirts. Picture mornings spent in the heart of the community, with neighbours nearby and the familiar sounds of the village around you. Beyond the village, the Xyliatos Reservoir lies a short drive away, an inviting place for walks by the water, and the neighbouring village of Agia Marina Xyliatou is close by too. A sizeable piece of land at the centre of a living village, waiting for the home that will make it complete.
