Description

Family Living and Long-term Investment

The Foundation of Your Future. This under division residential plot in the Kokkinotrimithia area represents a premier opportunity for custom home development in one of Nicosia's most rapidly expanding suburban districts. Falling within the H2 planning zone with a 90% building density and a 50% coverage factor, the property is perfectly suited for a spacious two-story family residence or a private dual-unit development. In March 2026, the local real estate market has been fundamentally revitalized by the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution on rental income, drastically improving the net position for long-term investors. Furthermore, the 2026 market is bolstered by the 6th Edition of the Housing Scheme for the Revitalization of Mountainous, Buffer Zone, and Disadvantaged Areas, which launched on March 2, 2026, offering significant financial grants for eligible applicants building primary residences in communities like Kokkinotrimithia. This under-division status ensures that the final plot will benefit from modern planning standards and updated infrastructure, a standard of smart investment we have guided for 3 decades of experience.

Description Under division residential plot in the Kokkinotrimithia area. It falls within the Residential Planning Zone H2 with a building factor of 90% and coverage of 50%. This residential land offers a level surface and is situated in a high-demand residential pocket undergoing modern parceling. The H2 zone's 90% building factor is a strategic advantage, allowing for the creation of a modern family home with ample space for outdoor amenities, capitalizing on the area's excellent accessibility and growing demand for high-quality suburban living.
