Description
Small Development and High-Value Living

The Foundation of Your Future. This spacious 827 sqm residential plot in the peaceful and growing area of Pera Chorio represents a strategic opportunity for those looking to balance high-yield potential with the comfort of an established suburban neighborhood. Falling within the Ka6 planning zone, the property offers a substantial building density of 90% and a 50% coverage factor, making it exceptionally versatile for either a bespoke high-specification family residence or a strategic small-scale multi-unit development. In March 2026, the local real estate market is notably robust following the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution on rental income, significantly improving net acquisition value and yield potential for investors. Furthermore, the 2026 market is supported by the 6th Edition of the Housing Scheme for the Revitalization of Specific Rural Areas, which launched on March 2, 2026, providing significant financial incentives for primary residence construction in the Nicosia district. The plot's generous size and flat topography ensure an efficient construction process, a standard of quality we have prioritized for 3 decades of experience.
