Description

Small Development and High-Value Living

This residential plot in Kaimakli represents a strategic opportunity for those looking to invest in Nicosia's most resilient urban neighborhood. Positioned as a corner plot near the landmark CIC garage, the property offers enhanced architectural flexibility and superior natural light, making it a standout choice for a premium residential project. Falling within the Kα4 planning zone with a building density of 120% and a 50% coverage factor, the site is perfectly suited for a modern three-storey residential building. In March 2026, Kaimakli has solidified its status as a primary destination for investors and residents alike, as the district benefits from a unique blend of traditional charm and substantial state support. This corner position ensures high visibility and ease of access, providing a secure and high-value foundation for a boutique apartment block or a significant family residence, a standard of smart investment we have guided for 3 decades of experience.

Description Nice corner plot in Kaimakli near CIC garage is now available for sale. With a building coefficient of 120% the plot is suitable for a three storey building. The property's level topography and prominent corner position provide an efficient foundation for a bespoke residential project in a community that values both heritage and modern urban accessibility.
