Description
Small Development and High-Value Living

The Foundation of Your Future. This corner building plot in a newly built area of Tseri represents a premier opportunity for those seeking to build a custom residence or a pair of modern family homes in one of the capital's most rapidly connecting suburban enclaves. Spanning 566 sqm and falling within the Kα6 planning zone, the property provides a building density of 90% and a 50% coverage factor, offering the ideal technical specifications for a sophisticated two-storey development. Being a corner plot adjacent to a green area ensures enhanced privacy and permanent open views, balancing internal living space with tranquil outdoor surroundings. A significant financial advantage of this asset is that it is not subject to VAT, providing an immediate and substantial capital saving for the buyer. In March 2026, Tseri has emerged as a top-tier destination for homebuyers following the landmark delivery of the 30.7 million euro Ippokratous-Argyroupoleos-Tseriou road network earlier this month. This major project has drastically improved daily life with four-lane connectivity and wide pavements, seamlessly linking the district to the Nicosia Ring Road. This plot's balanced building factors, green-side location, and VAT-exempt status ensure a secure and appreciating asset, a standard of smart investment we have guided for 3 decades of experience.
