### Description

Small Development and High-Value Living

The Foundation of Your Future. This large residential plot in Pera Chorio represents an exceptional opportunity for those seeking a balance between high-yield potential and a serene residential lifestyle. Falling within a planning zone with a substantial building density of 90% and a 50% coverage factor, the property is perfectly suited for either a large, bespoke family home or a strategic small-scale development. In March 2026, the local real estate market is experiencing a significant surge in value following the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution on rental income, drastically improving the net acquisition and yield profile for investors. Furthermore, the 2026 market is bolstered by the 6th Edition of the Housing Scheme for the Revitalization of Specific Rural Areas, which launched on March 2, 2026, offering combined grants for primary residences in eligible southern Nicosia communities. The availability of title deeds and the plot's generous dimensions ensure a secure and high-quality investment, a standard of quality we have prioritized for 3 decades of experience.

Description Large residential plot in Pera Chorio. It falls within the residential planning zone Ka6 with a building density coefficient of 90% and a coverage coefficient of 50%, maximum floors 2 and maximum height of 10m. Title deed is available. The property offers a level topography that allows for efficient architectural design, maximizing the 90% density to create spacious, high-value living units. Its position within a quiet neighborhood, combined with direct access to local infrastructure, makes it a primary choice for residential development.
