For Sale : € 345,000

Description

High-Yield Development and Strategic Acquisition

This residential plot in Palouriotissa represents an elite opportunity for high-density urban development, specifically optimized for the construction of a modern apartment building. Falling within the Kα3 planning zone, the property boasts a substantial building density of 140% and a 50% coverage factor, allowing for a vertical development of up to four storeys with a maximum height of 17 meters. A unique aspect of this offering is the owner's openness to an exchange (antiparochi) for apartments, providing a flexible and strategic entry point for developers looking to minimize upfront capital expenditure while securing a prime site. In March 2026, Palouriotissa has emerged as a focal point for urban redevelopment, driven by its immediate proximity to the capital's central business district and the sustained demand for high-quality housing from young professionals and the academic community. The local real estate market in 2026 is further bolstered by the historic tax overhaul on January 1st, which included the full abolition of stamp duty and the removal of the 3% Special Defence Contribution on rental income, making this an ideal "Build-to-Rent" asset. For those seeking to capitalize on Nicosia's urban growth with a high-yield development, this plot offers a secure foundation for 3 decades of experience.
