Description

Small Development and High-Value Living

This corner residential land under division in the scenic village of Ayia Marina Xiliatou represents a premier opportunity for custom home development in a region defined by its elevated position and breathtaking panoramic views of the Troodos mountains. Falling within the H2 planning zone with a 90% building density and a 50% coverage factor, the property is perfectly suited for a modern family residence or a high-end vacation home that prioritizes privacy, architectural flexibility, and the advantages of a corner position. In March 2026, the local real estate market has been fundamentally revitalized by the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution on rental income, drastically improving the net position for long-term investors. Furthermore, the 2026 market is bolstered by the 6th Edition of the Housing Scheme for the Revitalization of Mountainous, Buffer Zone, and Disadvantaged Areas, which launched on March 2, 2026, offering significant financial grants for eligible applicants building primary residences in communities like Ayia Marina Xiliatou. The plot's strategic corner dual-frontage and residential zoning ensure a secure and appreciating asset, a standard of smart investment we have guided for 3 decades of experience.

Description Corner residential land under division for sale in Ayia Marina Xiliatou. This property offers a unique vantage point with unobstructed panoramic views of the Troodos range and the practical benefit of a corner configuration, allowing for flexible architectural design and multiple access points. The land falls within Residential Planning Zone H2 with a 90% building density and a 50% coverage factor, allowing for a maximum of 2 floors and a height of 8.3 meters. This land is currently being divided into individual plots, providing a clean and organized canvas for immediate construction upon completion of the division process. The 90% building density is a strategic advantage for those seeking to maximize living space in a high-altitude setting, capitalizing on the area's fresh air and the growing demand for rural-suburban hybrid living in 2026.
