Falling within the Ka8 planning zone, the property offers a building density of 60% and a 35% coverage factor, providing a balanced canvas for a spacious private residence that prioritizes both interior luxury and significant garden privacy, especially given its proximity to a designated green area. In March 2026, the Nicosia residential market is experiencing a significant value surge following the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution on rental income, drastically improving the net value of land acquisitions. Furthermore, the 2026 market is characterized by a strong shift toward high-quality suburban living, supported by the government's 6th Edition of the Housing Scheme for the Revitalization of Mountainous, Near the Buffer Zone and Disadvantaged Areas, which launched on March 2, 2026, offering combined grants of up to 100,000 euro for eligible primary residences. The plot's placement within a high-demand neighborhood ensures a secure and appreciating investment, a standard of smart investment we have guided for 3 decades of experience.
