For Sale : **€ 195,000**

Description

High-Yield Development and Strategic Acquisition

This residential plot in Kaimakli represents a premier opportunity for developers to capitalize on the sustained urban growth within Nicosia's most characterful district. Falling within the Kα3 planning zone, the property offers a high building density of 140% and a coverage factor of 50%, allowing for a modern four-storey apartment complex reaching up to 17 meters in height. The area has become a focal point for investors in 2026 due to its unique blend of traditional neo-classical architecture and a surge in demand from the nearby academic community. This property is perfectly scaled to deliver high-density housing that meets the current market's appetite for sophisticated urban living and high-yield rental returns, a strategy we have perfected through 3 decades of experience.

Description Residential plot for sale in Kaimakli, located in a sought-after area with strong development potential. The plot falls within planning zone Kα3, allowing 140% building density, 50% coverage, and construction of up to 4 floors with a maximum height of 17 m. The site's level topography and established neighborhood setting provide an efficient foundation for a landmark residential project in an area defined by cultural revitalization and professional growth.
