Description
Small Development and High-Value Living

The Foundation of Your Future. This beautiful residential plot in Pano Deftera represents a sophisticated development opportunity in one of Nicosia's most serene and rapidly evolving suburban enclaves. Falling within the H2 planning zone, the property offers a building density of 90% and a 50% coverage factor, providing the technical capacity for a high-value small development or a spacious custom-designed family residence. This density profile is ideal for a versatile project that balances privacy with investment potential, such as a boutique complex of luxury houses or a private villa that capitalizes on the area's natural landscape. In March 2026, the Nicosia residential market is experiencing a significant value surge following the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution on rental income, drastically improving net yields for long-term investors. Furthermore, the 2026 market is characterized by a strong shift toward high-quality suburban living, supported by the government's latest green-building grants and infrastructure upgrades. The plot's superior technical specifications and its placement within a tranquil residential district ensure a secure and appreciating investment, a standard of smart investment we have guided for 3 decades of experience.

Description Beautiful plot for sale in a newly developing area of Pano Deftera, suitable for the erection of a family house. The plot allows for a modern architectural design that maximizes functional square footage while maintaining a sense of suburban exclusivity. Its position within the Lakatamia-Deftera corridor ensures access to essential infrastructure and professional municipal services. No VAT.
