Description
Family Living and Long-term Investment

The Foundation of Your Future. This beautiful residential plot in Pano Deftera represents an exceptional opportunity for those seeking to build a custom family home in one of Nicosia's most promising suburban growth zones. Falling within the H2 planning zone, the property offers a building density of 90% and a 50% coverage factor, providing a versatile canvas for either a spacious private residence or a modern development that prioritizes both living space and privacy. In March 2026, the Nicosia residential market is experiencing a significant value surge following the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution (SDC) on rental income, drastically improving the net value of land acquisitions and future yields. Furthermore, the 2026 market is characterized by a strong shift toward high-quality suburban living, supported by the government's latest Housing Scheme for the Revitalization of Mountainous and Disadvantaged Areas (6th Edition), which, as of March 2, 2026, offers combined grants of up to 100,000 euro for primary residences. The plot's placement within a newly developing, quiet neighborhood ensures a secure and appreciating investment, a standard of smart investment we have guided for 3 decades of experience.

Description Beautiful plot for sale in a newly developing area of Pano Deftera, suitable for the erection of a family house. The plot allows for a modern architectural design that maximizes functional square footage while maintaining a sense of suburban exclusivity. Its position within the Lakatamia-Deftera corridor ensures access to essential infrastructure and professional municipal services. No VAT.
