Family Living and Long-term Investment

The Foundation of Your Future. This 554m² residential plot in the prestigious and fast-growing GSP area of Lakatameia represents an exceptional opportunity for those seeking to build a bespoke family home in one of Nicosia's most elite suburban districts. Falling within the Ka8 planning zone, the property offers a building density of 60% and a 35% coverage factor, providing a balanced canvas for a spacious two-story private residence that prioritizes both interior luxury and significant garden privacy. In March 2026, the Nicosia residential market is experiencing a significant value surge following the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution on rental income, drastically improving the net value of land acquisitions. Furthermore, the 2026 market is characterized by a strong shift toward high-quality suburban living, supported by the government's 6th Edition of the Housing Revitalization Scheme, which launched on March 2, 2026, offering combined grants for eligible primary residences. The plot's placement within a peaceful environment with an 18m street frontage ensures a secure and appreciating investment, a standard of smart investment we have guided for 3 decades of experience.
