Description

Small Development and High-Value Living

The Foundation of Your Future. This 548 sqm residential corner plot in Kokkinotrimithia represents a premier opportunity for custom home development in one of Nicosia's most rapidly expanding suburban districts. Falling within the H2 planning zone with a 90% building density and a 50% coverage factor, the property is perfectly suited for a spacious two-story family residence or a sophisticated dual-unit project. In March 2026, the local real estate market has been fundamentally revitalized by the landmark January 1st tax reform, which fully abolished stamp duty on all new property contracts and removed the Special Defence Contribution on rental income, drastically improving the net position for long-term investors. Furthermore, the 2026 market is bolstered by the 6th Edition of the Housing Scheme for the Revitalization of Mountainous, Buffer Zone, and Disadvantaged Areas, which launched on March 2, 2026, offering significant financial grants for eligible applicants building primary residences in communities like Kokkinotrimithia. The fact that this property is a corner plot with a registered road and is not subject to VAT ensures a secure and highly cost-effective acquisition, a standard of smart investment we have guided for 3 decades of experience.

Description For Sale: Residential Corner Plot in Kokkinotrimithia, Nicosia. This 548 sqm corner plot is situated in a newly developing residential area and falls within the H2 planning zone. It features a 50% cover factor and a 90% building density, allowing for the construction of up to 2 floors with a maximum height of 8.3 meters. The corner positioning provides enhanced architectural flexibility, increased privacy, and dual-street access, making it ideal for a high-end villa or a small residential development.
