Description
Small Development and High-Value Living

The Foundation of Your Future. This 547 sqm residential plot on Gerakaris Street in Tseri represents a premier opportunity for those seeking to build a custom residence or a modern family home in one of the capital's most rapidly connecting suburban enclaves. Falling within the Kα6 planning zone, the property provides a building density of 90% and a 50% coverage factor, offering the ideal technical specifications for a sophisticated two-storey development that balances internal living space with private outdoor areas. With excellent road frontage and full services including water and electricity already in place, the site is primed for immediate construction. A significant financial advantage of this asset is that it is not subject to VAT, providing an immediate and substantial capital saving for the buyer. In March 2026, Tseri has emerged as a top-tier destination for homebuyers following the landmark delivery of the 30.7 million euro Ippokratous-Argyroupoleos-Tseriou road network earlier this month. This major project has drastically improved daily life with four-lane connectivity and wide pavements, seamlessly linking the district to the Nicosia Ring Road. The local real estate market in 2026 is further enhanced by the historic tax reform enacted on January 1st, which included the full abolition of stamp duty and the doubling of the Capital Gains Tax exemption for primary residences to 150,000 euro. This plot's balanced building factors, its VAT-exempt status, and its location within a high-growth infrastructure corridor ensure a secure and appreciating asset, a standard of smart investment we have guided for 3 decades of experience.
