Description

High-Yield Development and Strategic Acquisition

This residential plot in Kaimakli stands as a prime opportunity for investors looking to capitalize on Nicosia's most rapidly revitalizing urban pocket. With a high building density of 140% and a permitted height of 17 meters, the site is perfectly engineered for a modern four-storey apartment complex. Kaimakli has transformed into a strategic "crossover" zone, attracting a blend of academic demand from nearby universities and a trendy, "boho" residential interest from young professionals. The 50% coverage factor ensures an efficient build that can accommodate the necessary parking and structural requirements for a high-yield rental project, a standard of smart acquisition we have championed for 3 decades of experience.

Description A residential plot for sale in Kaimakli, Nicosia. It falls within planning zone Kα3, allowing 140% building density, 50% coverage, up to 4 floors and 17 m height. Suitable for residential development and subject to VAT. The land offers a level surface and a clear development path in an area increasingly defined by its blend of traditional neo-classical architecture and high-spec modern construction.
