Description

For Sale Residential Land In Akaki, Nicosia

A residential land parcel extending to 3,871 sq.m. is available for sale in the community of Akaki, Nicosia, offering an excellent opportunity for future residential development in a tranquil location that combines the charm of village living with convenient access to the wider Nicosia district. Positioned within an area that continues to attract residential growth, the property presents a compelling option for investors and developers seeking land with strong long-term potential.

The land benefits from a building density of 60% and a coverage factor of 35%, allowing for residential development of up to two floors with a maximum building height of 8.3 metres. These development parameters provide flexibility for a variety of residential projects, while the generous size of the property offers ample space for a well-planned development, subject to obtaining the necessary planning and building permits.

The property is currently landlocked, a factor that prospective purchasers should consider when evaluating future development opportunities and access arrangements. Nevertheless, its location remains highly attractive, being approximately 1 km from the centre of Akaki, around 6 km from Peristerona, approximately 13 km from Kokkinotrimithia and the Nicosia-Troodos motorway, and about 21 km from Nicosia city centre. This strategic position allows residents to enjoy a peaceful environment while maintaining convenient access to schools, services, amenities, and major road networks.
