Description

For Sale Agricultural Plot In Akaki, Nicosia

Strategic Agricultural Land Asset in Productive Akaki Peripheral Belt

Secure a substantial agricultural land portfolio piece with this expansive agricultural field for sale in the traditional, resource-rich farming community of Akaki, Nicosia. Spanning a highly versatile total footprint of 2,342 sq.m., this land asset represents an exceptional acquisition window for active local farmers looking to scale up crop production, private investors seeking a low-overhead property asset, or forward-thinking buyers aiming to secure affordable entry-level land within a major agricultural zone.

Standard Agricultural Planning Parameters

The property features uniform, high-reliability zoning characteristics under its primary rural classification framework, preserving your right to establish light agricultural structures or specialized farming installations:

Planning Zone: Γ3 (100% coverage) — The entirety of the field falls under the standard Γ3 agricultural zone, legally protecting the land from aggressive urban expansion and preserving it exclusively for rural, farming, and light eco-agricultural uses.

Building Density (Building Destiny): 10% — Allowing for localized building setups, which can be utilized to construct private storage sheds, tool repositories, pump housings, or administrative agricultural rooms.

Coverage Factor: 10% — Preserving a minimal construction footprint, keeping 90% of the land surface completely open and ready for intensive crop cultivation, greenhouse systems, or orchards.

Structural Allowance: Permits buildings up to 2 Floors with an official structural height threshold of 8.3 meters.

Access Optimization Profile (Landlocked Status)

Current Status: The field is currently landlocked, creating a highly competitive entry point and an attractive purchasing price well below standard market baselines for properties with direct road frontage.

Development & Farming Pathway: The property currently requires a registered road network to connect directly to its boundaries.

Under Cyprus property law, landlocked parcels retain the statutory right to request and secure a registered right-of-way (passage easement) through adjacent plots, allowing you to establish legal vehicular access for tractors, trucks, and farm equipment.

Nearby Landmarks & Amenities

Situated within the fertile farming plains of the western Nicosia district, the land offers a strategic rural position:

The Main Akaki Village Center is located just a short distance away, offering immediate access to local agricultural suppliers, machinery maintenance workshops, packing facilities, and community services.

The Troodos / Kokkinotrimithia-Akaki High-Speed Highway Link is highly accessible, providing fluid transit for transporting harvested agricultural produce directly to the major commercial markets and distribution hubs of Nicosia in under 20 minutes.

Neighboring Farms: Flanked by active citrus orchards, olive groves, and organized agricultural developments, highlighting the fertility and operational productivity of the immediate microclimate.
