For Sale : **€ 50,000**

Description

For Sale: Residential Field 660 sq.m. in Pervolia, Politiko, Nicosia

G&P Lazarou Estate Agents presents this residential field for sale, with a total area of 660 sq.m., located in Pervolia, Politiko, Nicosia District. It is an interesting option for buyers seeking residential land in a quiet location, with clearly defined planning parameters and potential for future development.

The field falls entirely, at 100%, within the H3 Residential Planning Zone, with a building density of 60% and a coverage ratio of 35%. Development is permitted up to 2 floors, with a maximum height of 8.30 metres. These planning parameters provide a clear framework for potential residential development, always subject to the necessary planning and building permits and approvals from the competent authorities.

An important practical advantage is the access via a registered road, while the field has frontage along one side. These characteristics provide a clear connection to the road network and can contribute to greater practicality when considering the positioning and design of a future residential development.

With an area of 660 sq.m., the field offers a practical landholding for residential use. The possibility of development up to 2 floors, combined with the 60% building density and 35% coverage ratio, may support the development of a comfortable private residence, depending on the final design and the purchaser's requirements.

The location of Pervolia in Politiko offers a quieter character and an environment that may appeal to those seeking an alternative to the intensity of urban areas. For a private buyer, the field could provide the opportunity to create a residence tailored to personal needs and lifestyle preferences.
