For Sale : **€ 60,000**

Description
Sea air, mature trees and open ground close to the coast make this residential field in Kato Pyrgos an appealing place to plan a future home. Its generous 4693 m² sits in a landscape-led setting away from dense urban development, with the sea close by and the village centre a short drive away.

Trees already grow within the land, and its uneven, irregular ground gives it a natural, unforced character. On land zoned for residential use, there is room to picture a home shaped around outdoor living and the Cyprus climate.

Everyday needs are within a short drive: supermarkets and shops, restaurants and cafés, a petrol station and a public service office. The neighbouring villages of Pano Pyrgos and Pigenia are also a short drive away. In the wider region, Gialia Monastery and the Cyprus Mouflon Enclosure add history and nature to the surroundings.

Above all, it is the pairing of generous space with coastal breezes and sea air that gives this land its lasting pull.
