Description
Beautiful natural surroundings and the everyday convenience of town life come together on this residential field in Athienou, one of the inland towns of Larnaca district. The town centre is only a short way off, and all the necessary services are close by, so daily errands stay simple while the landscape keeps its open, natural feel.

With 5017 m² to work with, the land offers real room to plan a home on residential land. Its regular shape and even surface make it an uncomplicated canvas that is easy to picture and easy to design around. A family house with plenty of space around it, set within a relaxed island lifestyle, becomes easy to imagine here.

Athienou offers an appealing balance. You can reach the town and its services with ease, yet return to a setting shaped by nature. This field sits comfortably between the two, practical for everyday living and pleasant to come home to.

This is a generous, level stretch of residential land in a natural setting that speaks to both heart and head.
