For Sale : **€ 55,000**

Description
Outside the busy centre of the village, this residential field for sale in Mammari offers level ground across a generous plot of 6689 m². It sits in a landscape-led setting away from dense urban development, where authentic Cypriot village life stays within easy reach of the capital.

The land is zoned for residential use and lends itself to a family home with room to breathe. Its even surface keeps early plans uncomplicated, and an asphalted road gives it direct road access, so getting on site is straightforward from day one.

The motorway linking Nicosia with the Troodos mountains is close by. Work in the city and weekends in the hills fit easily around a slower pace at home. Life in Mammari offers that balance: village character and open space without feeling cut off.

This sale is for a one-third share of the land. Space, level ground and a village address with fast connections make it a setting where a future home is easy to picture.
