Description
Set among the open farmland of Peristerona in the Nicosia district, this agricultural field covers 5,686 m² of countryside. The ground has a gentle slope and an irregular outline, and its agricultural zoning makes it suited to farming, cultivation or planting.

The field lies within the rural landscape around the village, away from dense urban development, and forms a practical addition to an existing agricultural holding in the area. This sale is for a half share of the field. It is a versatile piece of land with a gentle slope in Peristerona's farming countryside.
