Description
In the Lythrodontas area of the Nicosia district, this field of 4,831 m² lies a short drive from the village centre, with neighbouring Mathiatis also a short drive away. The ground slopes and the plot has an irregular shape.

About half of the land falls within an agricultural zone, suited to farming or planting. The other half falls within a residential zone, which gives room for a home on that part. The land has no direct road access. It is a sizeable, sloping plot that combines farmland with a residential part.
