

For Sale, Land, Plot, Nicosia, Deftera Pano, 520m²

For Sale : **€ 75,000**

Description
For Sale | Corner Rectangular Residential Plot of 520 m² with 44.74-Metre Frontage – Nicosia District
A corner rectangular residential plot of 520 m² is available for sale in Nicosia District, offering an interesting opportunity for individuals and investors seeking residential land with attractive development potential.
The property features a regular rectangular shape, a corner configuration and an impressive total frontage measurement of approximately 44.74 metres. These characteristics offer considerable flexibility for potential architectural planning and efficient utilisation of the available land.
The plot is currently classified as landlocked, meaning that direct legal access to a registered public road has not been established. Although the property is described as a corner plot, its road access status must be clarified before any development can proceed.
The property benefits from a building density coefficient of 90% and a coverage ratio of 50%, providing favourable planning coefficients for potential residential development.
Based on its total area of 520 m², these coefficients correspond to an indicative maximum buildable floor area of approximately 468 m² and an indicative maximum ground coverage of approximately 260 m².
The combination of its 520 m² land area, rectangular shape, corner position and substantial 44.74-metre frontage measurement makes the property an interesting option for buyers considering the construction of a private residence or another residential development, subject to the necessary legal access arrangements and planning approvals.
Its practical configuration and attractive planning coefficients also make it an appealing option for investors seeking a long-term residential land investment.
Situated within Nicosia District, the property is located in the wider residential surroundings of the capital.
Points of interest in the broader area include Lakatamia | Tseri | Paliometocho | Nicosia Mall | Nicosia City Centre.
Combining its corner configuration, generous frontage measurement, rectangular shape, 90% building density and 50% coverage ratio, this residential plot represents an interesting opportunity for buyers and investors seeking land with future development potential, subject to clarification of its legal access status.
