For Sale : **€ 95,000**

Description
For Sale | Corner Residential Plot of 566 m² with Impressive 44.29-Metre Frontage – Nicosia District
A corner residential plot of 566 m² is available for sale in Nicosia District, offering an interesting opportunity for individuals and investors seeking residential land with favourable planning coefficients and potential for future development.
The property stands out for its corner configuration and impressive total frontage measurement of approximately 44.29 metres, providing generous dimensions and flexibility for potential architectural planning.
The plot is classified as landlocked, meaning that direct legal access to a registered public road has not been established. Although the property features a corner configuration and a substantial frontage measurement, its legal access arrangements must be clarified before any proposed development.
The property benefits from a building density coefficient of 90% and a coverage ratio of 50%, offering attractive planning parameters for potential residential development.
Based on its total area of 566 m², these coefficients correspond to an indicative maximum buildable floor area of approximately 509.40 m² and an indicative maximum ground coverage of approximately 283 m², subject to applicable planning regulations.
The combination of its 566 m² land area, corner position, substantial 44.29-metre frontage measurement and favourable planning coefficients makes the property an interesting option for buyers considering the construction of a private residence or another residential development, subject to the necessary legal access arrangements and planning approvals.
Its generous dimensions and potential for future utilisation also make it worth considering as a long-term investment in residential land, taking into account its current landlocked status.
Situated within Nicosia District, the property is located in the wider residential surroundings of the capital. Points of interest in the broader area include Pano Deftera | Kato Deftera | Psimolofou | Tseri | Nicosia City Centre.
Combining its corner configuration, impressive frontage measurement, 90% building density and 50% coverage ratio, this residential plot represents an interesting opportunity for buyers and investors seeking land with future development potential, subject to clarification of its legal access status.
