Description
Aglantzia is a residential suburb of Nicosia, with a lively community centre of cafés and shops close by. Here, a flat, rectangular plot of 543 m² waits for the home you have in mind. Schools and green parks lie within walking distance, and the centre of Nicosia is a short drive away.

The land sits in a residential zone, where a home of up to two floors may be built. Its level ground and regular shape make a clear canvas for design, so you choose the layout, the materials and the finish. A generous frontage gives the plot direct road access and room to plan the entrance and the face the house will show to the street.

Picture mornings when the school is a short walk away, and evenings when cafés and the city are only a short drive off. A home here could take shape around the way you want to live, from the first sketch to the last detail.

Level land in a residential corner of Aglantzia, with a house of your own design still to be imagined.
