For Sale : **€ 285,000**

Description
Panoramic views across the surrounding area open up from this large residential field in Tsada, a village where restaurants and cafés lie within walking distance and the village centre is close at hand. It is a setting that invites you to linger, watching the landscape stretch away while village life carries on nearby.

Covering 14,047 m², the land forms part of a residential project, and seven homes have already been built within it. Its residential zoning points naturally to home life, with authentic village surroundings and the larger community of Mesogi a short drive away for wider everyday errands. The land has no direct road access.

Picture mornings shaped by that wide outlook and evenings spent strolling down to a café in the village. A distribution agreement is in place for the field. The sale is of a 61.57% share of the land.

Above all, it is the view that stays with you: open, far-reaching and part of daily life here in Tsada.
