For Sale : **€ 175,000**

Description
In the heart of Nicosia, in the Panagia quarter, this level plot puts city life on your doorstep. Supermarkets and shops sit right next to it, and schools are within an easy walk, so the small errands of daily life become a short stroll rather than a journey across town.

Covering 662 m², the land is rectangular with a smooth, flat surface, a clean and practical shape that is simple to plan around. It fronts the street directly, giving it direct road access, and it lies within the city's urban centre zone.

All around, homes and businesses stand side by side, and that blend gives the neighbourhood its everyday character: familiar faces, local shops and the steady rhythm of a city quarter going about its day. Here, a project can take shape with the conveniences of Nicosia already in place around it.

A level, well-proportioned piece of the capital, set among the life of one of its central neighbourhoods.
