For Sale : **€ 185,000**

Description
Among the homes and open parcels of Agioi Trimithias, a large field of 5,242 m² waits for someone with a vision. It lies in a residential zone, with room for a home of up to two floors and generous space around it.

The neighbourhood mixes residential developments with land still left open, so the setting keeps a sense of space while being part of village life. Schools and supermarkets are a short drive away, and neighbouring Paliometocho is close by too, keeping daily routines simple.

The land has no direct road access.

Picture a home designed from the first sketch, set on ground big enough to shape around the way you want to live. Here, in a residential corner of the Nicosia district, a generous plot offers a place to plan something lasting.
