A green area runs along one side of this residential plot in...

For Sale : **€ 165,000**

Description
A green area runs along one side of this residential plot in Archangelos Anthoupoli, Lakatameia, giving a future home an open neighbour to look out towards. Around it, the streets are lined with high-quality residential developments and detached houses, with a few undeveloped plots still among them.

The land is flat and rectangular, a simple shape to plan around, and its 733 m² offer generous room for a family home of up to two floors. It fronts the road directly, and water, electricity and telecommunication services are available.

Everyday life is well connected here. Schools are a short drive away, and the area enjoys very good links to Nicosia city centre and neighbouring Strovolos, so work, school runs and weekends in town fit easily around home.

Level ground, services in place and green space right beside it, all within an established residential neighbourhood: a calm, straightforward starting point for a home shaped entirely around your own plans.
