In the Apostolos Varnavas and Agios Makarios neighbourhood o...

For Sale : **€ 160,000**

Description
In the Apostolos Varnavas and Agios Makarios neighbourhood of Strovolos, this level residential plot offers a clean start for a home of your own. Around it, newly divided plots line the streets, in an area popular for upmarket homes.

The land has a regular shape and a flat, even surface, which makes it straightforward to plan on. It fronts a street, so it has direct road access, and electricity, water and telecommunications are already in place. The residential zoning allows a home of up to two floors, so you can shape the house around the way you want to live.

Everyday life stays easy from here. The motorway towards Limassol is within easy reach, and the centre of Nicosia is well connected. An electricity substation and a pathway run along one border of the plot.

A flat, serviced plot in a well-regarded corner of Strovolos, waiting for the home you have in mind.
