Description
In the Agios Nikolaos quarter of Lakatameia, this field lies next to the area's sports venues, among open parcels and a scattering of homes. The town is all around, yet the land beside it still has an open, unhurried character.

At 2,806 m², the field sits in a residential zone and offers room for a home of up to two floors. It is a sizeable stretch of ground on which to shape a plan of your own, with neighbours that are still few and far between.

Everyday life is close by. Schools, supermarkets, cafés and a park are a short drive away, and so are neighbouring Strovolos and Tseri. The land has no direct road access.

A large residential field with sports grounds for neighbours, in the familiar setting of Lakatameia.
