For Sale : **€ 95,000**

Description
Just outside the village of Kato Pyrgos, in the Nicosia district, this field of 2,676 m² lies among homes and undeveloped parcels of land. The setting is residential, with village life and its everyday comforts a short drive away.

The land falls within a residential zone, so it offers room for a home of up to two floors. Its large size leaves plenty of freedom to shape that home around the way you want to live. The land has no direct road access.

The village centre of Kato Pyrgos is a short drive away for the morning coffee or the weekly shop. For a slower afternoon, the old Gialia Monastery is within a drive.

A large residential field on the edge of a Cypriot village, with room to bring a home of your own to life.
